

Additional file 2: STROBE Reporting Checklist

Additional file 2. STROBE Reporting Checklist

STROBE checklist for cross-sectional studies, completed for the manuscript “*A Multiple Correspondence Analysis Approach to Mitigate the Non-Communicable Disease (NCD) Epidemic: Introducing a Health-Related Behavior-Based NCD Vulnerability Index.*” Section names and appendix letters refer to the main manuscript.

STROBE item	Recommendation	Location in manuscript
1	Title and abstract: study design and balanced summary	Title page; Abstract
2	Background and rationale	Introduction
3	Objectives	Introduction; Abstract
4	Study design	Data and Variables (Source of Data); Methodology
5	Setting	Data and Variables (Source of Data); Appendix D
6	Participants: eligibility and selection	Data and Variables (Source of Data); Appendix D
7	Variables: outcome, exposures, confounders	Data and Variables (Variables Used in Analysis)
8	Data sources and measurement	Data and Variables; Methodology
9	Bias	Methodology (endogeneity sensitivity index); Discussion
10	Study size	Data and Variables (N = 12,650); Appendix D
11	Quantitative variables and groupings	Data and Variables (tiers, age bands); Methodology
12	Statistical methods	Methodology (MCA; multilevel model; validation)
13	Participants: numbers at each stage	Source of Data (participant flow); Appendix D
14	Descriptive data	Results (Bivariate Analysis); Appendix D
15	Outcome data	Results (Bivariate Analysis)
16	Main results: adjusted estimates with confidence intervals	Results (Multilevel Logistic Regression Analysis)
17	Other analyses: subgroups and sensitivity	Results (Sensitivity NCDVI; MCA Robustness; External Validation; Decision Curve Analysis)
18	Key results	Discussion
19	Limitations	Discussion
20	Interpretation	Discussion
21	Generalisability	Discussion (External Validation on BDHS 2022)
22	Funding	Declarations
